The efficacy of **DESINFECT 20190715.1 / 20190715.2** against Murine norovirus strain S99 was tested in a suspension test according to the European standard DIN EN 14476:2013+A1:2015/prA2:2016. The effectiveness of the disinfectant was evaluated under both clean conditions (0.3 g/l BSA) and dirty conditions (3.0 g/l BSA + 3.0 ml/l erythrocytes) as interfering substance. The exposure time was 5 minutes. **In conclusion, the product DESINFECT 20190715.1 / 20190715.2 is effective against Murine norovirus strain S99 at room temperature under clean conditions (0.3 g/l BSA) and dirty conditions (3.0 g/l BSA + 3.0 ml/l erythrocytes) as interfering substance with an application time of 5 minute.**
